PROFESSIONAL SUMMARY

Flutter Developer with 3 years of hands-on experience across full-time, contract, and freelance work. Sole Flutter developer behind the Fego ride-hailing apps (User and Driver), rebuilt from scratch and published on Google Play and the App Store. Experienced in real-time systems (SignalR), Google Maps, Clean Architecture with Bloc/Cubit, automated testing, and CI/CD. Uses AI-assisted tools (Cursor, GitHub Copilot, Claude Code) daily to ship faster.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, iOS, App Store and Google Play publishing, App Lifecycle

State Management: Bloc, Cubit, GetX

Architecture: Clean Architecture, Feature-first Architecture, MVVM, Repository Pattern, Dependency Injection (get_it, injectable), Navigation (go_router, auto_route)

Networking and Real-Time: REST APIs, Dio, SignalR, WebSocket

Backend Services: Firebase Auth, Firestore, Firebase Cloud Messaging (FCM), Google Maps API, Geolocation, Geofencing

Testing: Unit Testing, Widget Testing, Integration Testing

Tools and DevOps: Git, GitHub, Codemagic CI/CD, Postman, Figma

AI-Assisted Development: Cursor, GitHub Copilot, Claude Code

PROFESSIONAL EXPERIENCE

Flutter Developer, Flieger Technology

Oct 2025 – Present

Full-Time, Hybrid | Cairo, Egypt

- Sole Flutter developer on the Fego platform: rebuilt the User and Driver apps from scratch (ride-hailing and delivery), published on Google Play and the App Store with 1,000+ downloads on each app.
- Designed and implemented a SignalR real-time layer for trip updates, live chat, and instant notifications.
- Integrated Google Maps for live tracking, routing, and geofencing-based trip events.
- Architected a feature-first Clean Architecture with Bloc/Cubit, get_it/injectable, and go_router/auto_route, enabling scalable and maintainable development.
- Wrote unit, widget, and integration tests to protect core trip and booking flows.

Flutter Developer (Contract), SHRKA

Jul 2025 – Oct 2025

Ismailia, Egypt

- Developed CRM feature modules using Flutter, Cubit, and REST API integrations.
- Set up Codemagic CI/CD pipelines for automated builds and QA distribution.

Flutter Developer, NETLAB ACADEMY [\[link\]](#)

2023 – Present

Remote

- Delivered production mobile apps in e-commerce, healthcare booking, and real-time communication.
- Integrated payment gateways, Google Maps, Firebase services, and real-time chat.

PROJECTS

Fego Driver and Fego User (Google Play, App Store): ride-hailing apps with live tracking, dispatch, and real-time chat. [Google Play](#)

CRM System (SHRKA): role-based enterprise CRM with a modular dashboard, built with Flutter and Cubit.

Dikkan (open source, GitHub): multi-vendor e-commerce app with authentication, cart, order workflows, Google Maps, and REST APIs. [\[GitHub\]](#)

EDUCATION

B.Sc. in Computer Software Engineering, Suez Canal University

Sep 2020 – Jul 2025

Ismailia, Egypt
